### Latest in Technology and Based on Industry Standards

- **Built-in Letter Wizard** offers unlimited possibilities for creating in-house mass letter mailing to groups of borrowers. Lender and payable mailings to be added soon.
- **User Customized Letters** provide quick setup utilizing letter templates previously saved as Rich Text Format documents in Microsoft Word or with direct letter input in the Letter Wizard Editor screen.
- **Merge fields** are provided as single fields or as function for a group of items to be inserted quickly into the document.
- **Word Processing functionality included** for fonts, bold, italic, underline, indent and more.

### Reasons why utilize a Letter Wizard functionality:

- It was specifically designed to facilitate the additional work involved in creating letters in-house for either a single client or a group of potential clients with merge codes from the loan data.
- It maintains a history of all letters sent to the client with easy retrieval and printing.
- Without this feature, users would have to maintain a separate database of prospects and clients for mass or individual mailings; having two systems simply lacks efficiency and promotes duplication of entries.

### Seven (7) reasons why choose GoldenOmega.

- **Compliance** - RESPA, IRS, DRE.
- **Efficiency** - Tracks loans, lenders & bank account.
- **Scalability** - Software meets every budget and grows.
- **Ease of Use** - Software with logical design.
- **Better support** - Prompt tech call responses.
- **Innovative Ideas** to enhance mortgage software.
- **Listen to Clients'** requests and suggestions.
